

Amendments to the Abstract:

Please replace the Abstract with the following new Abstract:

An asthma drug inhaler is provided with a whistle. The whistle may be attached to a small opening for air intake. The air intake may be part of a mouthpiece located on an inhalation passage of finely powdered drug. The whistle makes a sound when the inhalation is properly done.

Amendments to the drawings:

The attached sheets of drawing, submitted with Request for Approval of Drawing Changes, include changes to Figs. 7-9, 15 and 16 . These figures have been amended to include "prior art" in the legend.
